

# ODL2.5(I.S)

2.5 sq.mm offset double Level Internally Shorted Terminal Blocks.

ODL2.5(I.S) internally shorted Terminal Block , the top level is offset from the bottom level by half the thickness of the terminal block. this creates better access for the bottom level screw while the wires are connected. It is recommended to use End Plates at both ends of the assembled ODL2.5(I.S) sets for flat alignment to enable the effective use of end clamp. These are ideal for use in applications requiring high density wiring. Interconnection/shorting is possible with standard push in links.
